This resume has been tailored from a Fullstack Developer profile to a Revenue Controller position. Given the significant shift in roles, the focus is on highlighting transferable skills such as analytical abilities, process improvement, automation, data management, attention to detail, and cross-functional communication, which are all highly valued in a finance role. It's important to note that the original CV does not mention a Bachelor's degree in Accounting/Finance, an active CPA certification, or Big 4 accounting firm experience, all of which are listed as "MUST" in the job description. These are critical gaps. The tailored resume will present the existing qualifications accurately and strategically emphasize all other relevant skills to maximize the candidate's chances. ```html

Summary

Highly analytical and results-oriented professional with a proven ability to design, implement, and optimize complex systems, now seeking to leverage robust problem-solving and process automation skills within a Revenue Controller role. Combining an "eye of a designer" with a developer's precision, adept at translating complex requirements into clear, functional solutions and detailed reports. Possesses exceptional self-learning capabilities, a keen attention to detail, and a strong commitment to driving efficiency and ensuring data integrity. Adept at cross-functional collaboration and taking ownership of critical initiatives, contributing to long-term organizational objectives.

Experience

Senior Fullstack Developer   2017 – Present

Yad Eliezer (Philanthropic Organization), Jerusalem, Israel

- Designed, developed, and maintained end-to-end (E2E) web applications, including complex SQL queries and backend logic (PHP), ensuring data accuracy and efficient processing for operational and reporting needs.
- Led the development of user-friendly and responsive client-side interfaces (AngularJS / Angular), focusing on intuitive user experience and clear data presentation, applicable to building financial dashboards and reports.
- Implemented and maintained robust data security measures and protocols, safeguarding sensitive information and ensuring system integrity.
- Managed large databases, performing regular maintenance and optimization to support reliable data analysis and reporting.
- Developed performance-optimized algorithms and system architectures, demonstrating a capacity for detailed problem-solving and end-to-end project ownership from requirements gathering to successful deployment.
- Integrated with external APIs, showcasing the ability to connect disparate systems for comprehensive data aggregation and streamlined workflows.
- Gained extensive experience with advanced Excel for data manipulation, analysis, and reporting, alongside proficiency in XML for data exchange.
- Contributed to leading development processes and fostered cross-functional collaboration, ensuring project alignment with organizational goals.

Project Instructor (Angular)   2020

Banot Elisheva Seminar, Jerusalem, Israel

- Guided and mentored students in the development of Angular-based projects, emphasizing best practices in system design and implementation.

Project Instructor (.NET, WEBAPI, Entity Framework)   2019

Shevili Seminar, Jerusalem, Israel

- Instructed students on .NET technologies, including WEBAPI and Entity Framework, focusing on efficient backend development and database interaction.

Education

Associate's Degree (Practical Engineer) in Software Engineering   2016 – 2018

Banot Elisheva, Jerusalem, Israel

- Graduated with Honors (98 GPA).
- Completed a final project with Honors (100) using C# and SQL Database.

High School Diploma, Computer Science Major   2012 – 2015

Banot Elisheva, Jerusalem, Israel

- Completed 11 units in Computer Science.
- Graduated with Honors (97 GPA).

Technical Skills & Proficiencies

Data Analysis & Reporting: Advanced Excel, SQL, Big Data Concepts, Data Visualization (UI/UX)

Process Automation: Full-stack Development (Angular/JS, PHP), System Design & Architecture, Algorithm Development

Tools & Technologies: Html, JavaScript, CSS, Bootstrap, Ajax, JQuery, XML, Postman, Visual Studio / VisualCode   **Security:** Data Security Best Practices, VPN
